DESCRIPTION

The [Nitesite Eagle Night Vision System](#) is a patented night vision system for hunting in zero light. It converts your day scope into a powerful night vision system that is quick and simple to set up. It utilises infrared in a unique way making it more affordable, reliable and user-friendly than traditional light amplification technologies. The Nitesite Eagle Night Vision System is for the hunter who wants a product without limitations. From opening the carry case, to hunt ready status takes just 60 seconds once you are familiar with the setup. All NiteSites are equipped with adaptable fittings that enable mounting onto virtually any make and size of scope and there is no need to re-zero or adjust your scope in any way. Just mount the unit, switch on and you're ready to shoot. Simple as that.
