DESCRIPTION

The [Nitesite Eagle Night Vision System Combo](#) is a patented night vision system for hunting in zero light. It converts your day scope into a powerful night vision system that is quick and simple to set up. It utilises infrared in a unique way making it more affordable, reliable and user friendly than traditional light amplification technologies. The Nitesite Eagle Night Vision System Combo is for the hunter who wants a product without limitations. From opening the carry case, to hunt ready status takes just 60 seconds once you are familiar with the set up. All NiteSites are equipped with adaptable fittings that enable mounting onto virtually any make and size of scope and there is no need to re zero or adjust your scope in any way. Just mount the unit, switch on and you're ready to shoot.

Nitesite Laser Rangefinder

The Nitesite Mountable Laser Rangefinder has a colour OLED display that quickly and accurately provides all the data you need for targets up to 500m, including distance ranging, horizontal measurement and speed. The Nitesite Mountable Rangefinder can be quickly, easily and securely mounted using the sturdy bracket included. It can also be used with a traditional image intensifier and digital night vision riflescopes. The Nitesite Laser Rangefinder is designed for night use, even in zero ambient light conditions.
