Additional Information: I have chronied it with several pellets :-

- JSB 18.13gr 788.13 average fps = 25.00 fpe

(Ft-lb.)

- JSB 15.89gr 828.03 = 24.20
- Predator Poly Mags 16gr 844.60 = 25.34
- H&N Baracuda 21.14gr 697.50 = 22.84

This is an exceptional rifle, with great power! Had only about 50 pellets through it.
