Additional Information: The Umarex Glock 19X CO2 Air Pistol is ideal for a more versatile role because of its reduced dimensions when compared to the standard sized option. The CO2 airgun replica of the GLOCK 19 in .177 calibre is compact and handy, with the unmistakable look of the original pistol and plenty of power. In spite of its relatively small length of just over 18cm, it fires .177 calibre steel BBs and

has a satisfying weight. In true Umarex replica form, it has a metal slide and a trigger blade safety.
