Additional Information: http://www.garrison.net.za/index.php?route=product/product&path=59_63&product_id=50

- 1080P HD Full colour day-time recording
- 1080P HD Night-time recording.
- Record in MP4 format directly to internal Micro SD card (not included).
- Frame rate 30 fps.
- Compatible with OSX and Windows systems. Video footage can also be played back through viewfinder.
- Built-in 5w 850nm IR infrared illuminator 150yrd - 200yrd with variable focus from spot to flood and three power settings - high/med/low.
- Built-in 1mw laser, for use as a marker or range finding.
- Up to 8 hours run time (depending on built-in IR usage).
- Fits scope eye bell up to 48mm
- Easy fit aluminum scope mount - Allows 1/2 a turn fitting of the unit, locks in place solid and fits in seconds.
- Light weight design (250g)
- Recoil rated up to .308 caliber.
- Powered by a single rechargeable flat top 18650 battery (included).

- Digital zoom function. Increasing digital image size allows you to keep your scope optics at a lower magnification and allow more light in if required.
- Focus-able Dioptre
- Built in Wifi allows viewing and remote recording via phone or tablet using the dedicated app (ISO and Android compatible).
- Standby mode turns eye display off to prevent spooking of quarry from screen glare.
- Adjustable brightness and exposure control to allow greater detail during very low light conditions.
- 16mm Focus-able lens.
- Includes 42mm, 45mm or 48mm ring mount for fitting over ocular lens
