

EK Archery Cobra System R9 Crossbow - Black, Old hands with new bones is the way of looking at the iterative synchronization of engineering data with manufacturing realities. Is the design of a bow the defining factor of its performance? Strangely enough, it isnt. Its how the limbs, the riser, the cams, the strings, and also the components are form. In fact, over three decades EK Archery has observed the product failures of the famous archery brands as they insist on price as the bottom line. Ek archery brings you a best seller of EK Archery Cobra System R9 Crossbow - Black 90lbs cobra system series This attitude towards mass production leads to a decrease in the quality of archery products. Ek Archery Research resists this trend through an iterative manufacturing process that also involves our fabrication teams through several design stages to correct problems as they appear. As prototypes emerge from the design process, these are subject to the input of end-users. Trends amongst users are analyzed, and also products redesigned. Great bows come into being and are assembled through the Acumen of our Workshop Masters.
