

Lynx 7x50 Binoculars made in Japan, great name., Great name and quality in binoculars, optics are clear and all photos are of the actual binoculars. It has a large body design to accommodate large prisms which transmit more light and produce wider-angle images. Rubber covering reduces the chance of damage to the finish and the internal components. Multi-coated optics transmit more light than regular lens coatings, and reduce image flare and increases image contrast. The result is a bright, clear, sharp and colour-true image.
