

SHOTGUN 12GA BERETTA 692 SPORTER 30IN. The futuristic Beretta 692 competition over-under shotgun falls right in between our vault-like DT10 and the trimmer 680 series. At its core is a 1.6"-wide receiver designed to give superior balance and stability as well as intuitive shouldering and fast target acquisition by placing more weight between the hands. Also, the action is engineered to withstand the rigors of tens of thousands of rounds of serious training and competition, with its two huge locking lugs and replaceable barrel shoulders. And giving you adjustable trigger, adjustable ejection-extraction, adjustable balance and (optional) adjustable comb, the 692 can truly become an extension of your body.
