

Spyderco POLICE S/S Original VG-10, Early Gen.!, The legendary heavy duty folder of Spyderco in its most successful version, half plain/serrated, made in Seki JAPAN! Solid hollow ground blade of VG-10 S/S, measuring 4.125". Boye Dent cutout in back lock to prevent unintentional release. At 159 gr. it's the sturdiest Police model ever produced! Drilled & tapped holes for 4-way carry. Gently used so, in great shape. Never sharpened! Only the inevitable carry marks on the S/S scales that add to its character! Long discontinued & hard to get in this original (non- plastic handle!) version. A classic Spyderco by all accounts! SERIOUS cutting performance...
