

Microtech autohawk, 2019 sees the rebirth of the classic Hawk push-button automatic knife. Originally released in 1996, this knife revisits the classic folder with updated aesthetic features redesigned for a sleeker finish and increased functionality. Streamlined Karambit blade and automatic firing mechanism make for a sturdy and modernized take on this iconic piece. Excellent ergonomics, a carbide glass breaker, and jimping right where you need it are readily apparent at first sight. But, it's the incredible design of the spine, tight tolerances, and industry-leading action that you can't see that make all the difference. This knife is simply amazing.
