Additional Information: The Easy Anneal machine makes cartridge case annealing simple and affordable.

The hopper and feed system is fully adjustable for cartridge diameters from 8 to 16 mm, and lengths from 35 to 80 mm. This includes the small .222 and .223 Rem, as all the belted and other magnum cases, as well as .338 Lapua. A short case adaptor is also included for cases such as 6.5 Grendel and 6 mm BR.

All metal construction and powder coating ensures reliability and durability. The frame, stand, wheels and hopper components are made from steel and aluminium, and internal shafts, gears and brackets from steel.

Price includes all accessories for any case size as well as a gas torch.
